

Estudo De Paridade Total - Coreproviders Para Monetarie

Gerado em 2026-06-24 21:38:53 .

Conclusao executiva

O escopo dos tres fronts foi mapeado de forma estatica e reproduzivel. As rotas e menus coreproviders relevantes agora estao cobertos ou explicitamente adaptados; os itens restantes sao gaps de backend/API/RBAC ou handoffs documentados. Cabines PIX, SPB e STA ficaram fora da validacao executada nesta rodada, conforme escopo atual.

Resumo geral

	Frete	Arquivos CP	Arquivos Monetarie	Mesmo caminho	Adaptados caminho	Faltas caminho	Rotas faltantes	Menus faltantes	APIs locais sem rota estatica	Gaps RBAC	RBAC invalido
ib-front / banking	137	193	125	12	0	0	0	0	0	0	0
merchant-front / merchant	120	139	114	6	0	0	0	0	0	0	0
coreadmin-front / admin	186	521	186	0	0	0	0	0	0	0	0

Validacao local

```
- `git diff --check`: codigo `0`
- `admin pnpm build`: codigo `0`
  Executado manualmente nesta rodada: pnpm --filter @monetarie/admin build.
- `banking pnpm build`: codigo `na`
  Nao reexecutado nesta continuacao; usuario pediu continuidade em merchant-front e coreadmin-front.
- `merchant pnpm build`: codigo `0`
  Executado manualmente nesta rodada: pnpm --filter @monetarie/merchant-portal build.
- `backend mix compile`: codigo `0`
  Executado manualmente nesta rodada: mix compile.
```

ib-front / banking

Port funcional do banking coreproviders para o banking Monetarie, preservando identidade visual e fluxos locais.

- Arquivos coreproviders: 137
- Arquivos Monetarie: 193
- Arquivos no mesmo caminho: 125
- Arquivos adaptados em caminho/fluxo local: 12
- Arquivos faltando no mesmo caminho: 0
- Rotas faltantes por name: 0
- Rotas equivalentes com nome/path local diferente: 2
- Menus faltantes por path normalizado: 0
- APIs locais sem rota Phoenix detectada estaticamente: 0
- Gaps RBAC: 0
- RBAC invalido contra seed local: 0

Rotas faltantes por name

- Nenhuma.

Rotas equivalentes com nome/path local diferente

- CP `business-onboarding` `/business-onboarding` -> local `business-onboarding-cnpj` `/business-onboarding`
(`src/views/nextcode-onboarding/NextCodeOnboardingView.vue`)
- CP `inTransit` `in-transit` -> local `in-transit` `in-transit` (`src/views/in-transit/InTransitView.vue`)

Menus faltantes por path normalizado

- Nenhum.

Arquivos adaptados em caminho/fluxo local

- `src/shared/api/index.ts`: Adaptado para `src/http/api.ts` e `src/lib/api.ts` locais.
- `src/shared/components/FlxBottomNav.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/FlxDrawer.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/FlxFinancialCard.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/FlxHeader.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/FlxQuickAction.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/FlxSidebar.vue`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/components/index.ts`: Design system consumido via pacote @monetarie/shared/components.
- `src/shared/i18n/index.ts`: I18n local fica nos arquivos `src/i18n/\*`.
- `src/shared/theme/index.ts`: Tema consumido via pacote @monetarie/shared/theme.
- `src/shared/theme/useTheme.ts`: Tema consumido via pacote @monetarie/shared/theme.
- `src/views/settings/ChangePasswordView.vue`: Fluxo local mantido em `src/views/auth/ChangePasswordView.vue`.
